

Questionnaire to INGID members about ongoing and new research projects and support for research education

Why Have You Received This Questionnaire?

At the last General Meeting in Marseille, the INGID members decided that a questionnaire should be sent to all members to gather information about

- Ongoing research projects involving INGID members
- Issues where more or new research is needed
- Research education needs

Below, you will find a link to a digital questionnaire. Please click on the link for the language in which you would like to complete the questionnaire. You can choose to answer the questionnaire using your PC/Mac or your mobile phone.

Completing the questionnaire will take approximately 10 minutes.

What Happens to My Answers, and What Will They Be Used For?

Your responses will form the basis for support and actions related to INGID research (projects and research education).

The Director of Research and Development, Ann Gardulf, will receive the answers. Together with the Research and Development Team she will summarize the answers and share the results with the members at the INGID Conference 2026 and with the INGID board.

The results will only be presented at a group level, ensuring that individual answers cannot be identified (i.e., it will not be possible to trace specific responses to individual members). Please note that the results will not be published.

Thank you very much for your participation. It will help us provide a better support to you.
